The Secretary of State has looked at your submission on this subject.

She agrees with the recommendation you made, that the 3 different parts of the NNP system (the nomination/bidding process; the quality/funding aspect; and the ownership rules) should be separated out on the face of the Bill so that each might be repealed independently of the others.

She also agreed that this amendment should be kept back until we really need to use it - probably at port stage, alongside a promise of an early review of the ownership rules.
